**MAURIZIO
BERTI
EARNSHOW**

Maurizio Berti is an electronic engineer specialised in microelectronics and currently serves as CTO at Quantum Leap, part of Engineering Group, where he leads technology transfer strategies and training programmes.

He has extensive experience in open innovation, open source and collaboration with research institutes, SMEs and large industrial groups, and has also been active in the TEDx Italy community since 2012.

About this Event

How to design an IP strategy that creates real impact beyond patents

Join us for an Innovation Breakfast at ICMol with Quantum Leap, focused on how a well-designed intellectual property strategy can help transform research results into real opportunities, from collaborations and licensing to new projects and business models.

Main Topics

- 01 Intellectual property strategy beyond patents
- 02 Technology transfer and IP valorisation
- 03 Turning research results into market opportunities
- 04 Collaborations with companies and licensing pathways

Speaker
**BARBARA
SANAVI**

Barbara Sanavio has a background in biotechnology, biophysics and management, with a PhD from SISSA and an MBA from Politecnico di Milano Graduate School of Management. She joined Quantum Leap in 2024 and specialises in technology scouting, IP valuation, market positioning, IP strategy, business modelling and strategic partnerships.
